

Dobble matemático

Instrucciones y juegos

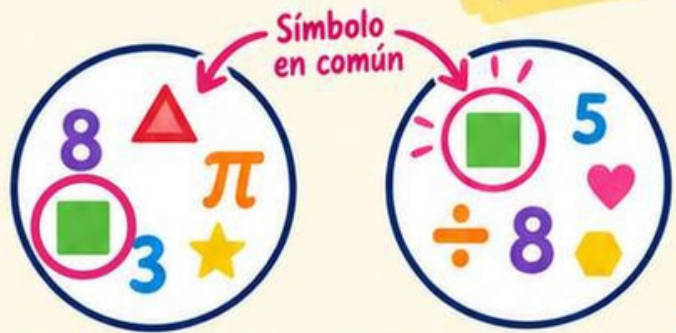

¡Observa
Calcula
Diviértete!

Las matemáticas también se juegan

Regla clave

Entre cualquier pareja de cartas siempre hay 1 símbolo en común.

Objetivo

Encuentra antes que los demás el símbolo que coincide entre dos cartas.

Preparación

- Recorta las cartas.
- Barájalas bien.
- Reparte o coloca el mazo según la modalidad de juego.

Formas de jugar

1. El montón

Cada jugador tiene 1 carta y hay un montón central. Encuentra la coincidencia entre tu carta y la del centro. Si aciertas, ganas la carta.

2. Descartar rápido

Todos empiezan con varias cartas. Busca la coincidencia con la carta central y descarta una lo más rápido posible. Gana quien se quede sin cartas.

3. Torre

Cada jugador tiene una carta. Se destapan nuevas cartas del mazo. El primero en decir la coincidencia se lleva la carta. Gana quien acumule más.

4. Duelo visual

Dos jugadores comparan sus cartas. El primero en señalar el símbolo común gana el punto.

Consejos

- Nombrad el símbolo en voz alta.
- Podéis adaptar el tiempo y la dificultad al curso.
- Ideal para repasar geometría, cálculo y estadística.

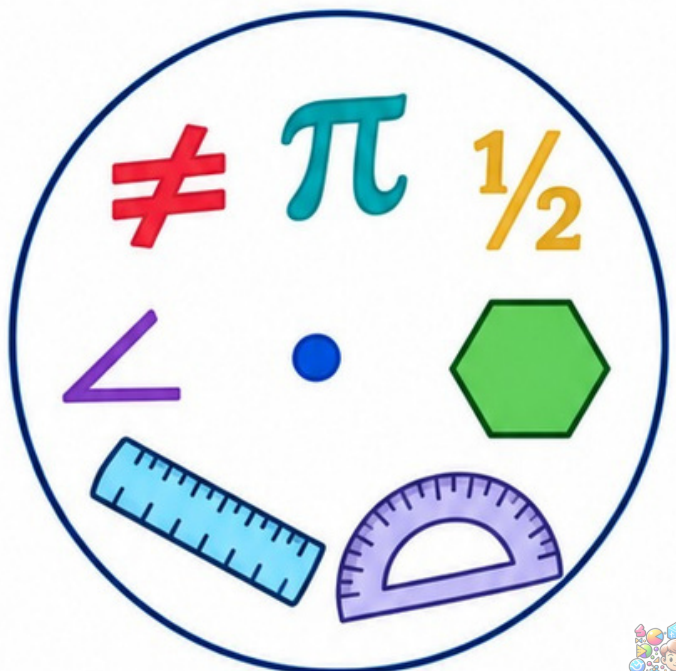

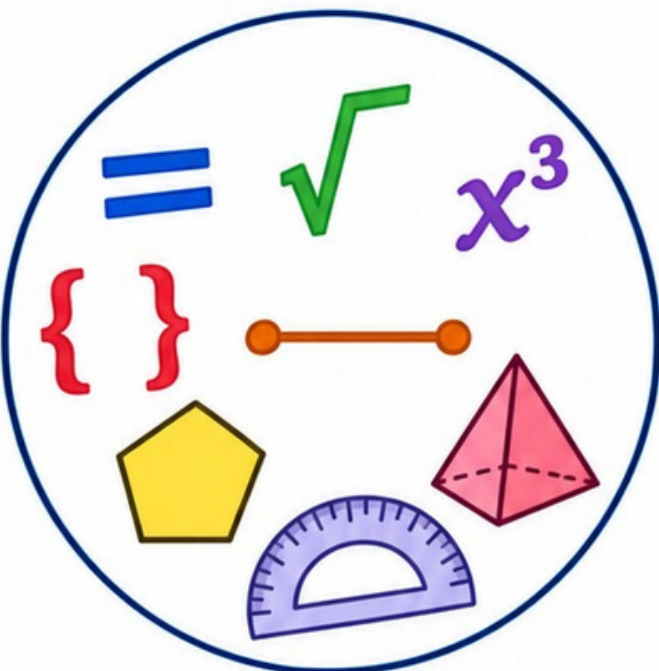

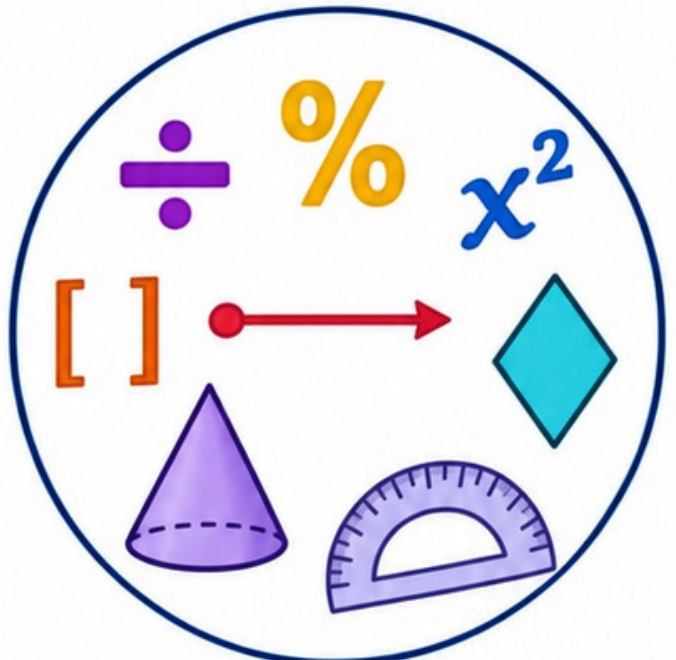

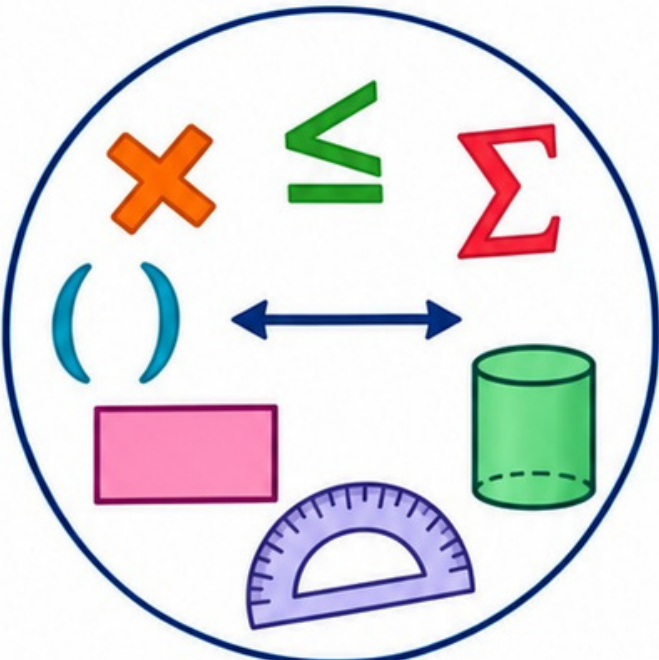

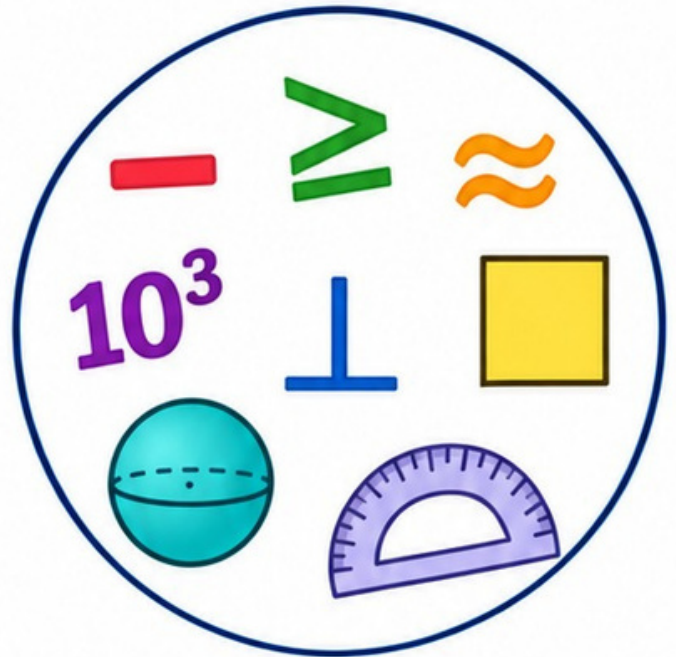

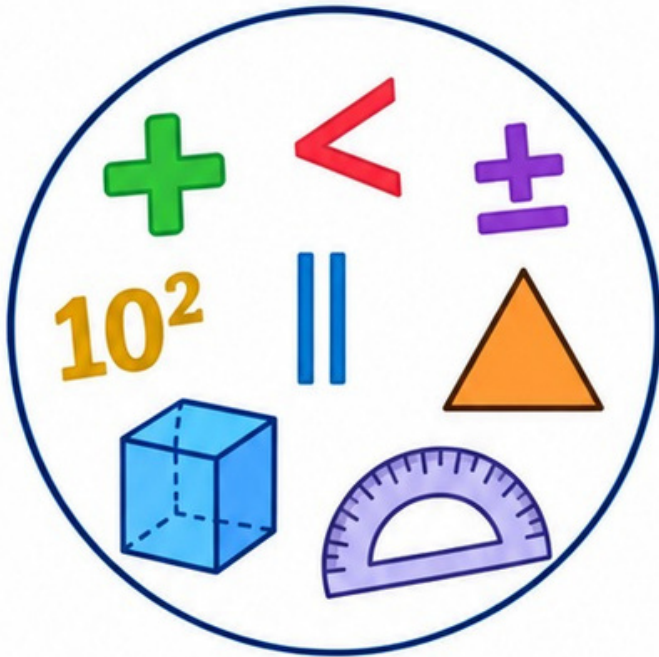

¡Misma carta, muchas posibilidades!

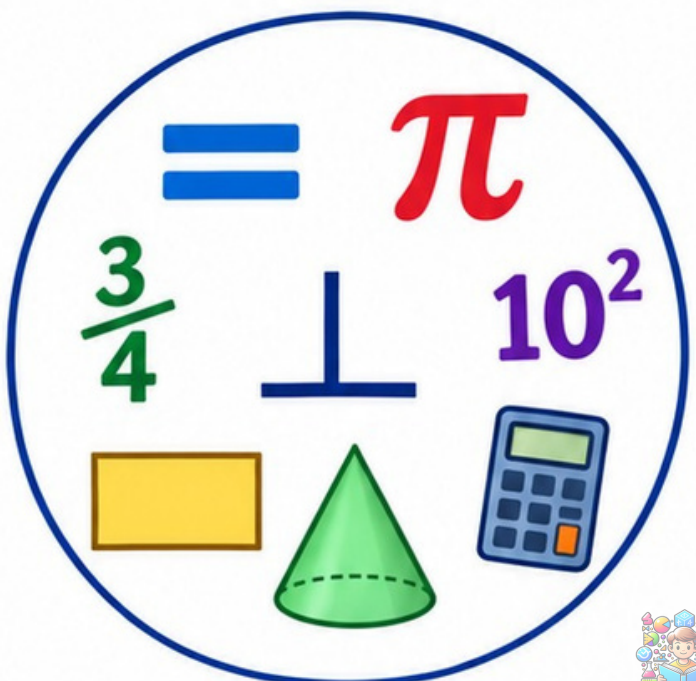

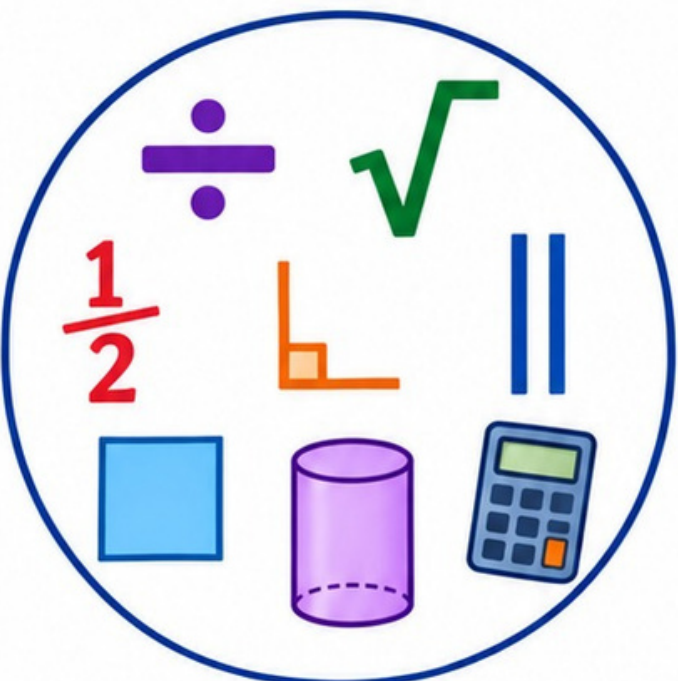

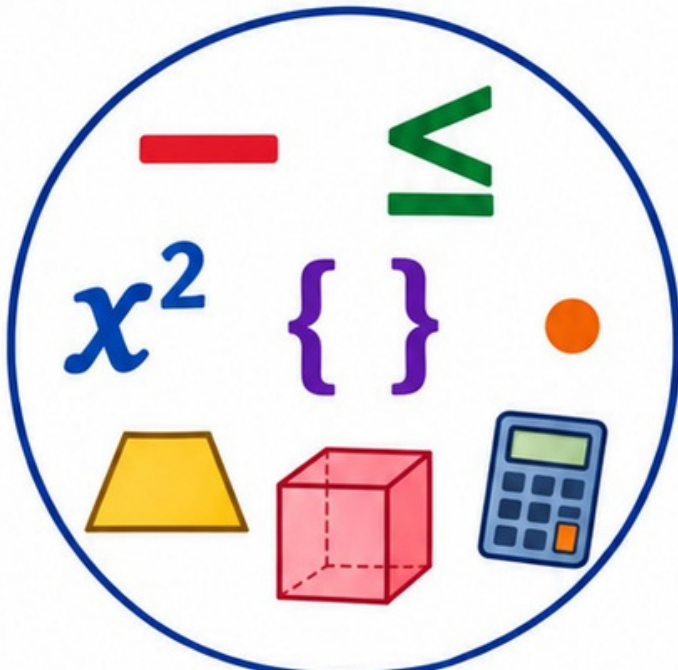

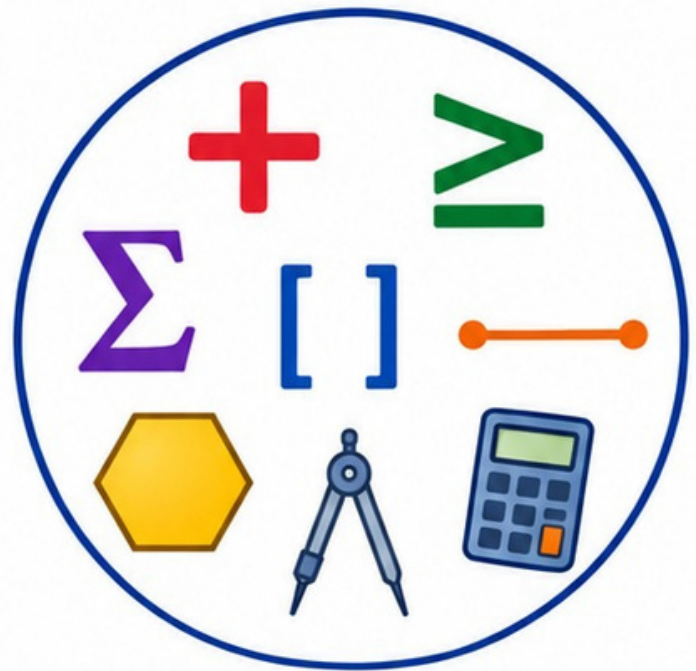

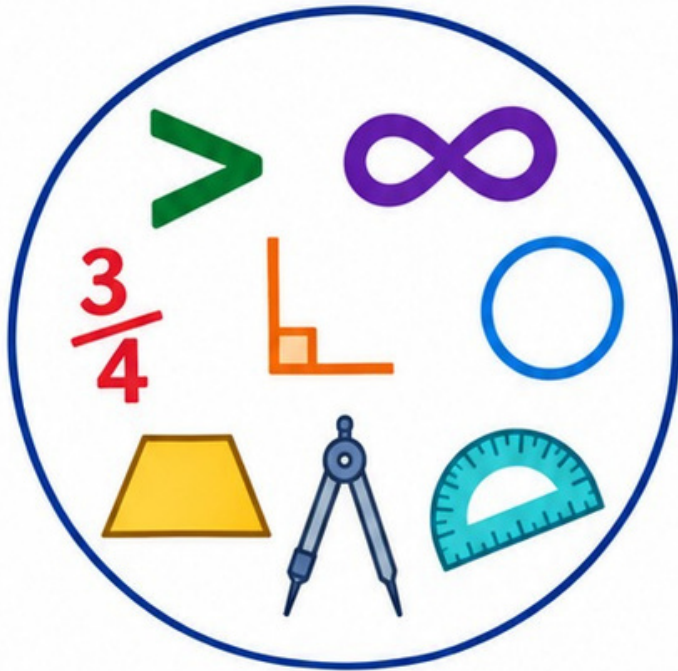

Pequeños símbolos, grandes aprendizajes
